Super OBD2 means more power and more torque. The Plug & Go device increases the efficiency of the motor. Super OBD2 is easy to install. Just plug it into your car's OBD2 connector and it fits all cars since 1996. It works based on OBD2 protocols as a car computer ECU remapping. After driving a total distance of 200 km, Super OBD2 adapts to the car and discovers the hidden power of your car. Red color Power Increase 35% 25% increased torque
