

## Przełącznik Seki Solar Isolation Switch Plug and Play 4-pin

category: Kategorie > SOLAR System

QR code:

The DC main switch is used to switch off the solar modules.

It is installed in the string line between the modules and the grid inverter or the charge controller.

Depending on the configuration, it can switch a max. switching current of up to 32A at a max. voltage of up to 1000V.

### Technical Details

Type: PV Isolation Switch  
Version: with MC4 compatible connectors  
Rated Voltage: 1000V  
Max. current: 32A  
Insulation Voltage: 1500 V  
Protection class: IP66  
Contact material: Copper, Tin-plated  
Flame Class: UL94-VOE  
EAN: : 4053171964783  
Customs Tariff Number: : 85369095
