### ***PS QUAD TELE SYSTEM TS401F converter.***

The Quad LNB is a quad LNB with four F outputs. It is used to feed the signal to four different tuners (eg simultaneous signal reception from one antenna ). Compatible with HDTV and DVB-S2. Also recommended for professional collective installations. This converter will also work well for receiving very weak signals.

**frequency range**

10.7 - 12.75 GHz

**LO frequency**

9.75 / 10.6 GHz

**The frequency of the output**

950 - 2150 MHz
