

Seki Solar Isolation Switch 4-pin

kategoria: Kategorie > SOLAR System

Kod QR:

The DC main switch is used to switch off the solar modules.

It is installed in the string line between the modules and the grid inverter or the charge controller.

Depending on the configuration, it can switch a max. switching current of up to 32A at a max. voltage of up to 1500V.

Technical Details

Type: PV Isolation Switch
Version: with 4PCS M25 Cable glands
Rated Voltage: 1000V for cable diameter: 2,5mm² - 16mm²
Max. current: 32A
Insulation Voltage: 1500 V
Protection class: IP66
Contact material: Copper, Tin-plated
Flame Class: UL94-VOE
AN: : 4053171964776
Customs Tariff Number: : 85369095
